EDUCATION

University of San Francisco (USF), San Francisco, CA
B.S. in Computer Science

May 2020

WORK EXPERIENCE

Boonoob, San Francisco, CA (Remote)

Jun 2020 - Present

Fullstack Software Engineer

- Led the front end web development team create our web app in React, implementing responsive design.
- Created REST web API endpoints on the server to handle multiple HTTP requests in Node.js.
- Increased number of users by collaborating with the production team to create customer friendly features including comment, chat room, messaging, payments, and more functionalities.

Fanmire, San Francisco, CA

Jan - May 2020

Fullstack Software Engineer

- Led the development team to create a social media aggregator using Twitter, Facebook, and Instagram APIs done in Node.js, Express, stored data in MongoDB, and did unit testing with Postman.
- Created an elegant, dynamic, and interactive web client using Vue.js, Axios, and HTML/CSS/JS.

ThinQ.tv, San Francisco, CA (Remote)

May - Aug 2019

Front End Web Developer Intern

- Collaborated with the front end web development team to design an elegant and functional UI.
- Improved number of audience members by adapting design according to user tests and problem solving.
- Developed front-end code to construct a webpage that is easy to navigate and continually visit.

PERSONAL PROJECTS

Harvard Art Gallery React

Sep 2020 - Present

- Designed and developed interactive web app featuring an art work aggregator using Harvard Art Collections API, a simple and elegant UI, sort, search, and dark/light mode functionalities.
- Solidified React/Hooks skills with dynamic rendering, all device responsiveness, and state management.

Twitter React App v1.0

Jul - Aug 2020

- Created a replica of Twitter web app using React.js which features basic post, like, and retweet functionality and a rich, interactive, and well-performing user interface which looks identical to Twitter.
- Improved React skills using reusable components, routing, all device responsiveness, and care to detail.

Pizza Ordering Application - Java

Jun - Oct 2017

- Designed interactive user-friendly GUI of 38 items including a variety of pizzas, sides, drinks, etc.
- Developed the Java Swing application where the user has the full experience of ordering from an extensive menu, add/edit/delete items from cart, and checkout.

Don't Get Hit By The Hay Game - Python

Dec - Jan 2017

- Did full-stack development on a platform PC game which gets more difficult as the player progresses.
- Handled video game mechanics in Python + Pygame and graphic user experience.
