

# Elijah Delos Reyes

## Software Engineer

Pleasant Hill, CA 94523 · (925)270-6681 · delosreyes.elijah@gmail.com  
linkedin.com/in/elijah-delos-reyes · github.com/eedelosreyes2 · eedelosreyes2.github.io

### EDUCATION

**University of San Francisco (USF)**, San Francisco, CA  
B.S. in Computer Science

May 2020

### WORK EXPERIENCE

**Boonoob**, San Francisco, CA (Remote)

Jun 2020 - Present

#### Software Engineer

- Created REST API endpoints on the server to handle multiple HTTP requests, done in Node.js.
- Integrated payment system (Stripe), increasing the amount of users due to this key functionality.

**Fanmire**, San Francisco, CA

Jan - May 2020

#### Software Engineer

- Developed a dynamic website featuring a social media aggregator that pulls a user's posts from Twitter, Facebook, and Instagram, stores data into MongoDB, and displays all onto a single, elegant news feed.
- Created the server, social media scraper, and client and designed a simple user interface using VueJS, Javascript, Node, Express, Axios, and HTML/CSS.

**ThinQ.tv**, San Francisco, CA (Remote)

May - Aug 2019

#### UX/UI Engineering Intern

- Collaborated with the front-end team to design an elegant and functional user interface.
- Adapted design according to user tests and problem solving to improve number of audience members.
- Worked on front-end code to construct a webpage that is easy for users to navigate and continually visit.

### NOTABLE PROJECTS

**Elijah Delos Reyes | Software Engineer (Portfolio)**

May - June 2020

- Developed the second iteration of my personal website and portfolio, optimized for all devices.
- Designed with Adobe XD, built using HTML/CSS/JS and Jekyll, and hosted on Github Pages.

**Pizza Ordering Application (Personal)**

Jun Oct 2017

- Did full-stack development on a Java application dealing with databases.
- Designed interactive user-friendly GUI of 38 items including a variety of pizzas, sides, drinks, etc.

**Don't Get Hit By The Hay Game (Personal)**

Dec - Jan 2017

- Did full-stack development on a platform PC game in Python.
- Handled video game mechanics and graphic user experience.
